READY. SET. SHARE.

Discover a simple and scalable platform for sharing content and information to TVs, computers, and mobile devices.

SHARE & TELL.

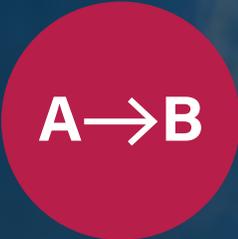

Communications are complicated enough. That's why we created a communications platform that's not just powerful, but is also simple to use.

Simply put, Appspace is a robust content management system and a user-friendly app for TVs, computers, smartphones, and tablets. Together, they turn those devices into digital signs, or corporate video players, and put the same content right at users' fingertips.

Simple, right? The only thing easier is making a list of all the ways you will use it.

LEARN MORE.

Contact our experts at sales@appspace.com.

A→B

EASY TO USE

Streamlined workflows make it easy to manage and publish content.

FULL CONTROL

Robust toolset provides complete technical and creative control.

CLOUD & ON-PREM

Available in the cloud or as an on-prem solution for flexible deployment

INTUITIVE APP

User-friendly app delivers relevant content to users across all devices.

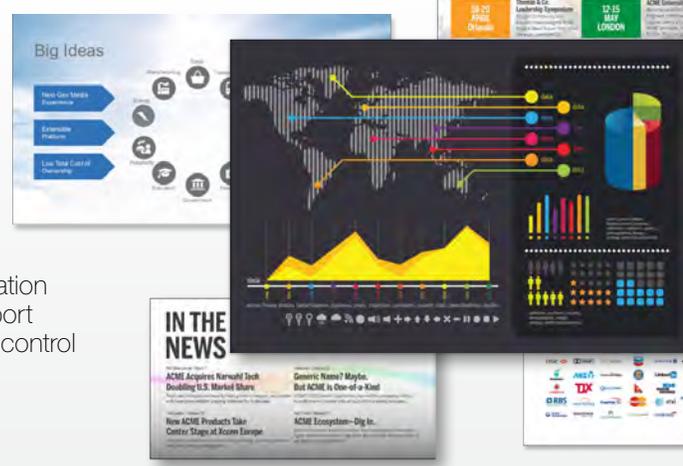

Advanced Digital Signage

SEE THE SIGNS.

Appspace includes a comprehensive set of tools for creating and managing advanced digital signs and digital signage networks.

- Advanced scheduling
- Alert messaging support
- Extensive widget library
- APIs for custom widget creation
- Live & recorded video support
- Complete remote endpoint control

Appspace App

ONE APP TO RUN THEM ALL.

We have just one app for all the devices and operating systems that connect to Appspace, providing consistency across platforms. In most cases you just install it from a device's specific app store and you're ready to go.

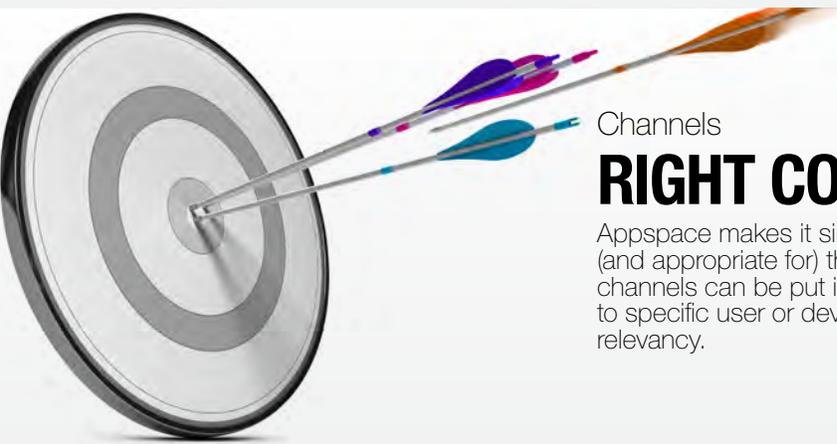

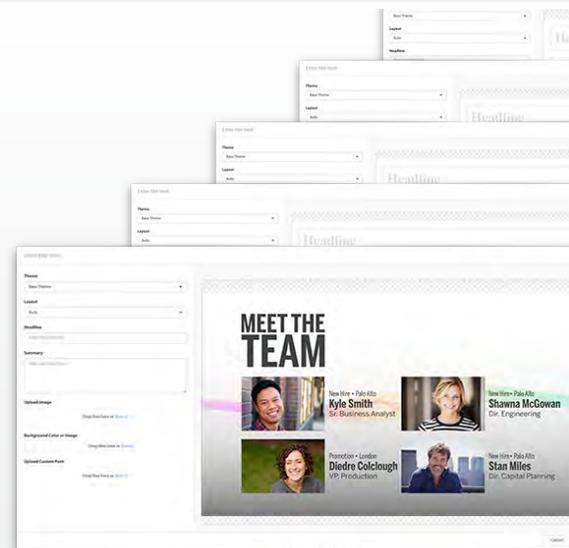

- Standardized app
- TV, web, and mobile device
- Intuitive user interface
- Support for Brightsign, Cisco, Google Chrome OS, MediaVue, and Samsung devices.

Cards

LET ANYONE MANAGE CONTENT.

Our platform revolves around "cards." Just fill in a card with text, add images, and choose how it all should look on a TV or mobile device, and you have a package of formatted content that can be shared across your channels. Brand owners can even define card templates and lock down their layouts, backgrounds, colors, fonts, and text formatting.

- Create once, display anywhere
- Link to social media feeds & other third party content
- Control corporate branding
- Create customized cards with advanced functionality

Channels

RIGHT CONTENT, RIGHT PEOPLE.

Appspace makes it simple to give people only the information that's relevant to (and appropriate for) them. Content in the platform can be designated as channels, channels can be put into groups, and access to channel groups is assigned to specific user or device groups. Goodbye information overload. Hello content relevancy.

"Thanks to Appspace we can publish our internal content at click speed across 500 locations."

Rolf Van Den Eynde
IT Manager
Delhaize Group

"Appspace is great, really easy to use and meets all of our enterprise needs."

Jeff Weiss
Director of Store Systems
Dave & Busters

"Appspace will allow us to scale well in the future and support continuous improvement."

Ibrahim Youssef Al-Tuwaijri
Director of Educational and Training Technology Administration
KFMC

"Appspace is proving a great tool for distributing messages to each campus community at strategic times."

Leanne Findlay
Internal Communications Manager
University of Western Sydney

"...the scalability of the system has proven to be one of its great benefits, giving us the ability to change content on a large volume of screens with a single simple change."

Adrian Witcombe
Business Improvement Manager
Village Cinemas Australia

Dallas | London | Dubai | Kuala Lumpur | Sydney
