

Supplier Name: Cinos Limited

Publication Date: 6th January 2023

Commitment to achieving Net Zero

Cinos Limited is committed to achieving Net Zero emissions by 2047.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2022

Additional Details relating to the Baseline Emissions calculations.

This is the first time that Cinos are reporting our carbon emissions. The baseline emissions are based on data from calendar year December 2021 – December 2022. The baseline calculation includes Scope 1, Scope 2 and Scope 3.

We will track and measure our carbon footprint and deliver on our Carbon Reduction Plan, with the intention of achieving Net Zero emissions by 2047 in line with PPN 06/21.

Baseline year emissions:

Emissions	Total (tCO ₂ e)
Scope 1	136
Scope 2	31.7
Scope 3 (Included sources)	2500 Upstream transportation and distribution and Downstream transportation and distribution (Freight): 1.44k <i>(Note: Our Carbon Calculator combines Upstream Transportation and Downstream Transportation under one category – Freight. We are in the process of working to split this data down further but confirm that both are included in this single figure.)</i> Materials: 995 Waste: 0.329 Business Travel: 25.7 Employee Commuting: 41.2 Water: 5
Total Emissions	2667.70

Believe in Excellence

Current Emissions Reporting

Reporting Year: 2022	
Emissions	Total (tCO2e)
Scope 1	136
Scope 2	31.7
Scope 3 (Included sources)	2500 Upstream transportation and distribution and Downstream transportation and distribution (Freight): 1.44k <i>(Note: Our Carbon Calculator combines Upstream Transportation and Downstream Transportation under one category – Freight. We are in the process of working to split this data down further but confirm that both are included in this single figure.)</i> Materials: 995 Waste: 0.329 Business Travel: 25.7 Employee Commuting: 41.2 Water: 5
Total Emissions	2667.70

Emissions reduction targets

Cinos do not have any previous emissions reduction targets, and this is our first carbon footprint.

In order to progress to achieving Net Zero, we have adopted the following carbon reduction targets.

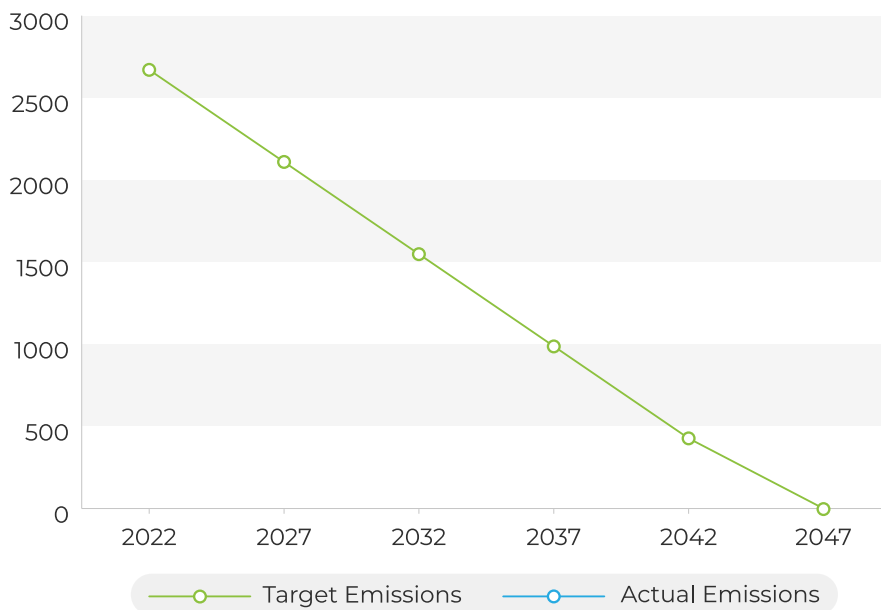

We project that carbon emissions will decrease over the next five years to 2.11k tCO₂e by 2027. This is a reduction of 21%.

Longer term, we aim to make the following carbon reductions to be able to meet Net Zero by 2047.

- 2032 – Decrease to 1548.6 – This is a reduction of 26.6%
- 2037 – Decrease to 987.90 – This is a reduction of 36.2%
- 2042 – Decrease to 427.20 – This is a reduction of 56.8%
- 2047 – Decrease to Zero – This is a reduction of 100%

Carbon reduction targets are shown in the graph below, as this is the first year of reporting on Carbon Reduction, we are unable to show progress against actual emissions, but this will be updated in the next Carbon Reduction Plan we produce.

Carbon Reduction: Projected vs Actual (tCO₂e)

Believe in Excellence

Carbon Reduction Projects

To reduce Carbon Emissions in the next 5 years, Cinos will undertake the following activities:

- Support Employees to use Low Impact Transport
- Switch to renewable electricity.
- Install solar panels.
- Incentivise employees to buy Electric Vehicles (EVs) for commuting to work.
- Install fleet driving efficiency systems.
- Development and maintenance of Environmental Management System to maintain our ISO14001 accreditation.
- Flexible and remote working facilitated through technology, and accessible to all employees to reduce office travel.

We will be constantly evolving and adding Carbon Reduction activities into our operations in line with our accreditation to ISO14001 to ensure that we are able to meet our Net Zero target by 2047.

In future we hope to implement further measures such as:

- Forming an ESG working group with carbon reduction as a key area, to continuously develop and introduce carbon reduction actions.
- Introducing more carbon offset measures.
- Delivering carbon literacy training to all employees.

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard and uses the appropriate Government emission conversion factors for greenhouse gas company reporting.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of Cinos Limited:
