AirMedia[®] 2

Enterprise ready. User approved.

Why wireless presentation?

- Frees people to sit or stand anywhere in the room or space and easily connect their smart devices or laptops to room display, regardless of OS
- No more wires or dongles cluttering table – in fact, you don't even need a table
- Enable collaboration in flexible spaces – e.g., cafeterias, hallways, private offices

What is AirMedia® 2.0?

The fastest, easiest, most manageable,
and secure wireless presentation technology

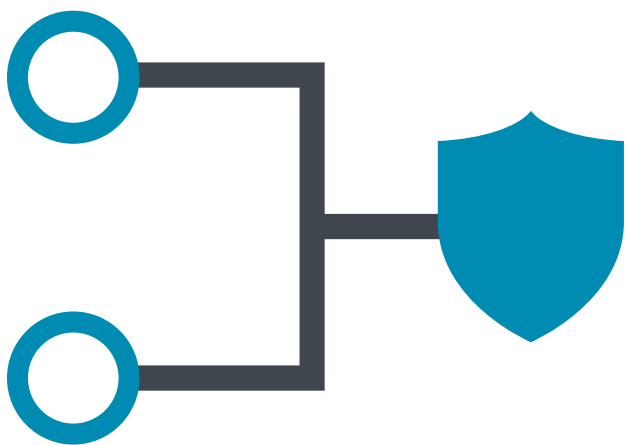

Simple to use

Connect from any browser on any network.

Great video

Smooth video playback with synchronized sound
and real-time keyboard and mouse tracking.

Secure endpoint

Works with your existing infrastructure – not against it.

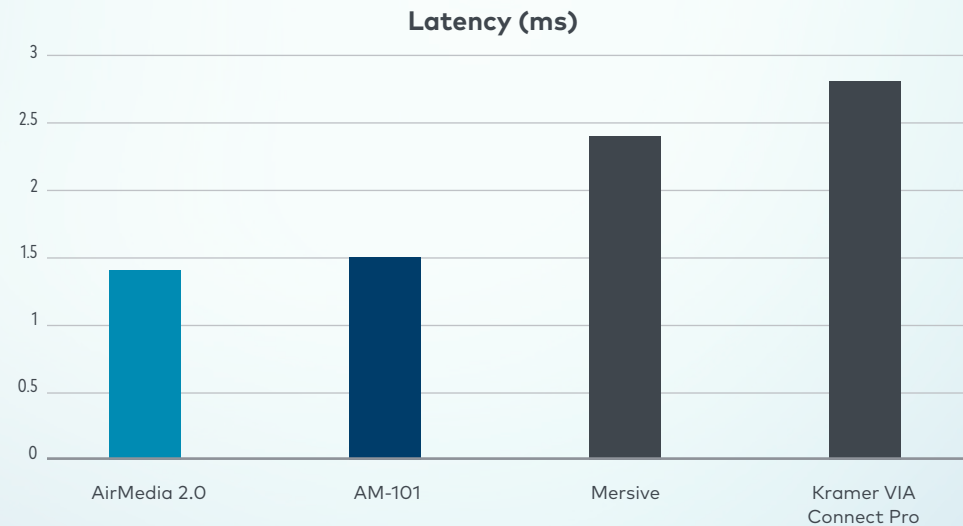

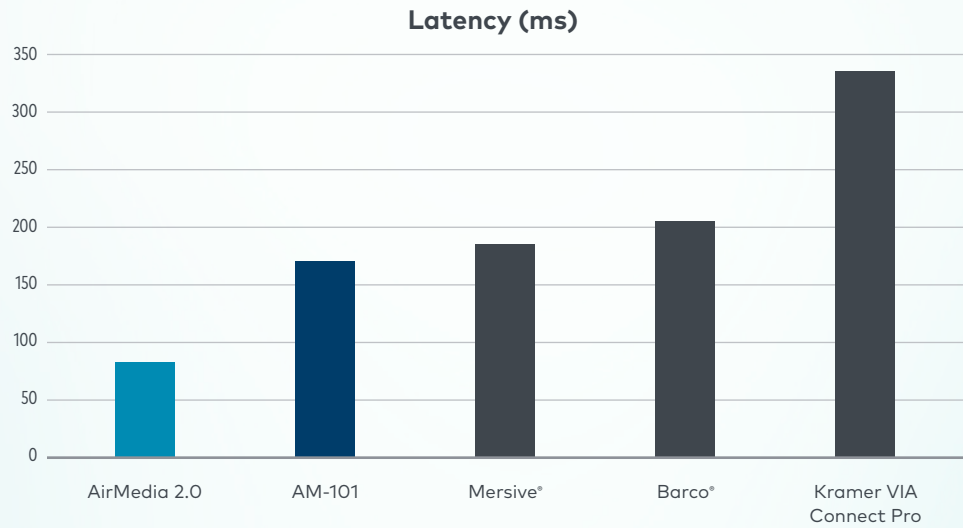

Manage remotely

Deploy and update without going from room-to-room.

Consistent user experience in every room and space

With AirMedia 2.0, there's no more wasting valuable time figuring out how to get the technology in the room or space to work. With a consistent, simple, and intuitive user experience from the network-deployed app, guest app, or native device app, all you have to do is show up and start presenting.

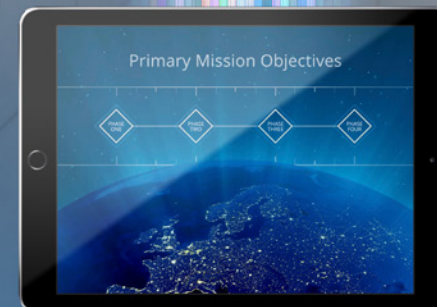

Better performance

- **Lowest bandwidth consumption**
Keeps content flowing smoothly on Wi-Fi® networks
- **Smooth video playback**
With synchronized sound and real-time keyboard and mouse tracking
- **Lowest Latency on the market**
Critical for interactive content such as spreadsheets

Secure endpoint

Works with your existing infrastructure

- 802.1x network access control
- Active Directory® user authentication
- AES-128 content encryption
- SSH, SSL, TLS, and HTTPS

Manage remotely

AirMedia 2.0 uses Crestron XiO Cloud provisioning for mass configuration and firmware upgrades

- **Deploy**
Devices power on and connect to the Cloud
- **Manage**
Push firmware updates
- **Monitor**
Know about system outages before your users do
- **Evolve**
Understand how spaces are being used to drive future design decisions

AirMedia family of products

The Crestron AirMedia Wireless Presentation Gateway (AM-101) was a groundbreaking solution that set the industry standard for enterprise-grade wireless presentation. With AirMedia 2.0, the best wireless presentation technology just got even better. It's available in two new AirMedia Presentation Systems. AirMedia 2.0 capability is also built into our powerful, award-winning, and industry-leading DigitalMedia™ all-in-one 4K presentation systems and Crestron Mercury®, the only open UC solution.

AM-101
Wireless Presentation Gateway

Standalone device for easily adding wireless presentation capability to legacy rooms.

AM-200
AirMedia Presentation System with
AirMedia 2.0 and HDMI® in and out

Standalone device that enables organizations to convert lobbies, lounges, and other open spaces into productive meeting spaces.

AM-300
AirMedia Presentation System with
AirMedia 2.0, DM® in, and HDMI in and out

All the functionality of AM-200 plus DM input for connecting to in-room DM transmitter.

DMPS3-4K-250-C
 DigitalMedia™ Presentation System
 with AirMedia 2.0 capability built-in

All-in-one presentation system ideal for multi-source rooms with a single display.

DMPS3-4K-350-C
 DigitalMedia Presentation System
 with AirMedia 2.0 capability built-in

All-in-one presentation system ideal for multi-source, multi-display rooms.

Crestron Mercury
 AirMedia 2.0 capability built-in

All-in-one tabletop UC and AV solution that supports all videoconferencing services.

AirMedia 2.0 in every space

AirMedia 2.0 gives you total flexibility to meet the needs of every room and space. From open spaces, stand-up spaces, and huddle spaces, to classrooms and conference rooms, AirMedia 2.0 enables you to increase workflow and facilitate collaboration.

Cafeterias

Digital signage during lunchtime and productive ad hoc presentation space during off-peak hours. Crestron AirMedia Presentation Systems (AM-200 and AM-300) mount invisibly behind wall mount displays and enable wired or wireless presentation. No furniture, dongles, or new Wi-Fi networks needed.

Stand-up spaces

Ad hoc meetings were never this easy. With AirMedia 2.0, anyone can connect on the fly and start presenting. No cords or chairs required.

Huddle spaces

Present wired and wirelessly with AirMedia 2.0 Presentation Systems or Crestron Mercury. Additionally, Crestron Mercury, the only open UC and collaboration solution, supports any video conferencing service. When not in use for meetings, leverage AirMedia 2.0 Presentation Systems for digital signage.

Meeting rooms

AirMedia 2.0 makes it easy to hand off between multiple presenters, either wired or wirelessly. Upcoming meeting details, room availability, and connectivity instructions are conveniently shown on the room display.

Classrooms

AirMedia 2.0 makes the educational experience simpler and more engaging. Both students and instructors can easily present and share ideas from wired and wireless devices including laptops, mobile devices, and in-room computers.

Conference rooms

AirMedia 2.0 empowers larger meetings in dual-display conference rooms, delivering the best possible presentation experience, wired and wirelessly, and the ability to easily share content and collaborate.
