Crestron Fusion®

Monitoring & Scheduling Software

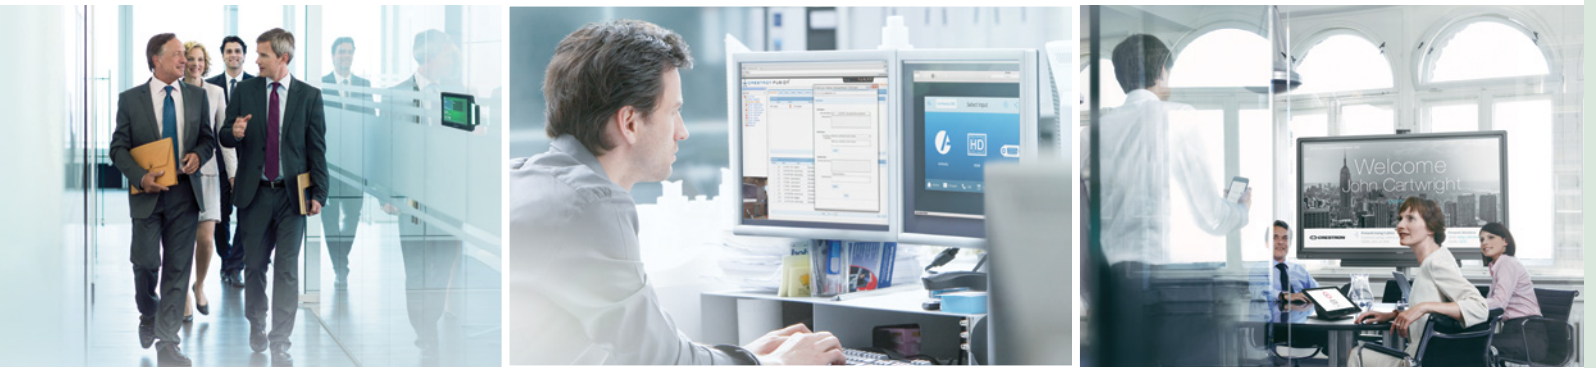

CRESTRON

Crestron Fusion®

Crestron integrates systems and technologies that typically operate in silos, so they work together as a single system.

Crestron Fusion monitoring and scheduling software adds a layer of intelligence to turn an organization into a high-performance enterprise.

It's easier than ever to get all the powerful tools clients really want, including network room scheduling, remote help desk, global device monitoring, and data collection and reporting.
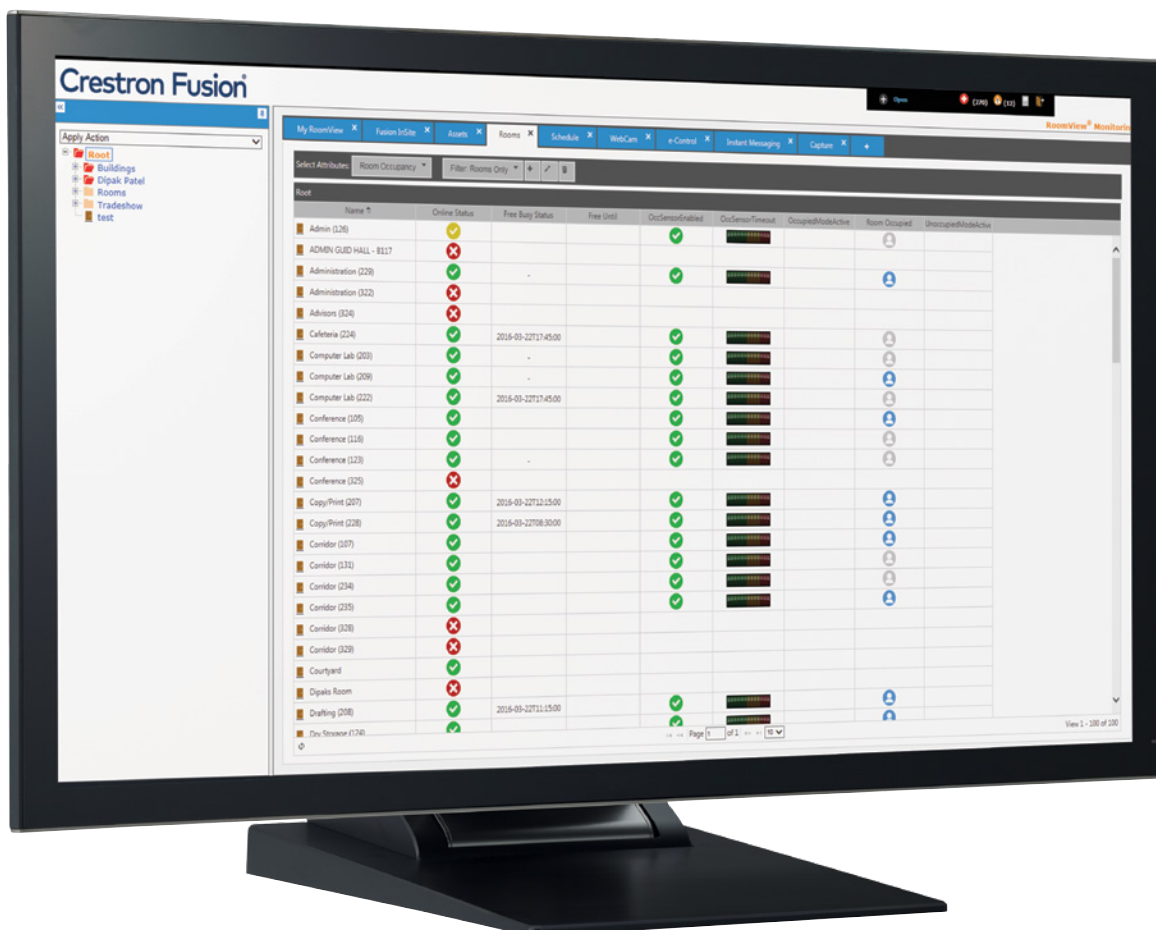

Deployment Options

Crestron Fusion software is easier than ever to purchase and install. Simply order one of these two options, and then download the software.

Crestron Fusion On-Premises

SW-FUSION-P-L
• Unlimited rooms per license
• Lifetime service, support, and updates

Crestron Fusion Cloud

SW-FUSION-C-3
• Up to 250 rooms per license (For larger deployments, simply order multiple quantities)
• 3-year service, support, and updates

Room Scheduling

Crestron Fusion gives you an elegant solution to the complexity of meeting scheduling.

Connects to Microsoft Exchange®, Office 365, Google® Calendar™, IBM® Notes®, CollegeNet® R45, Condeco, and more

Book rooms from scheduling panels outside the room for ad hoc meetings

Clearly see room availability on scheduling panels or room signs from down the hall

Display room calendar on Crestron in-room touch screens and even on the room display

Rooms are automatically returned to inventory in event of a "no-show"
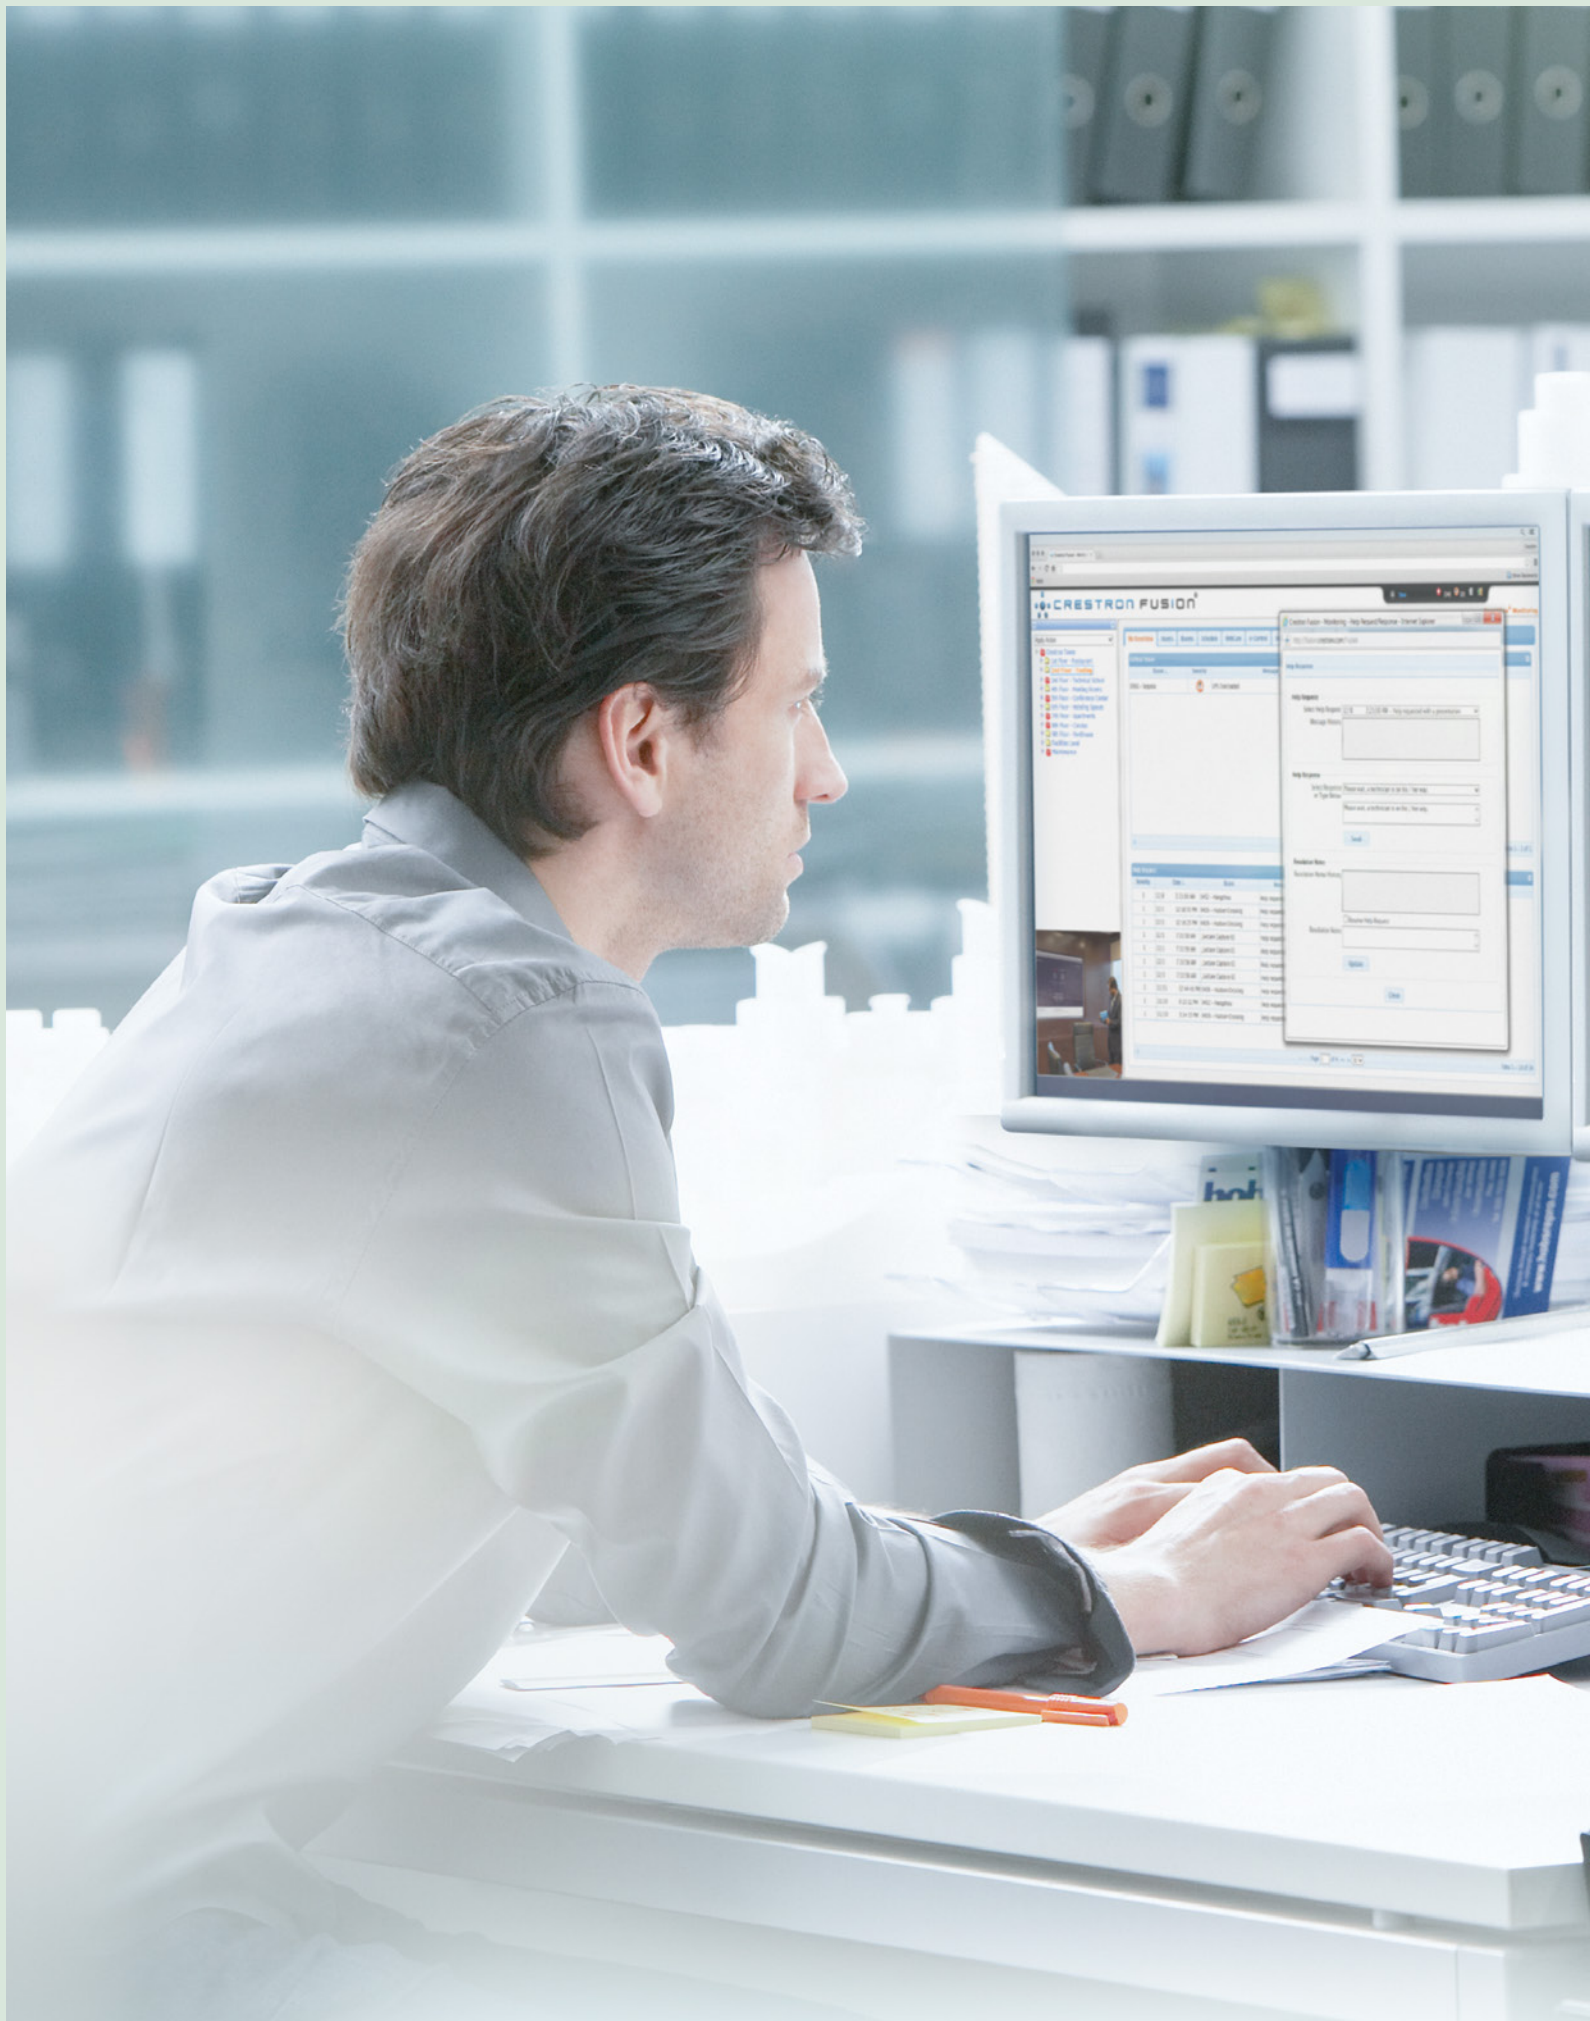

Help Desk and Support

AV and IT staff get alerts to remotely resolve events quickly to maximize uptime.

Meeting attendees can contact support staff from the touch screen in the room

Support staff can resolve issues during a meeting by remotely taking control of devices in the room

Store and organize all technical documentation by room for quick reference

Global Device Monitoring

Real-time alerts allow support staff to proactively manage events, so rooms are fully functional and ready for the next meeting.

Get instant status notifications for any device in any room on the network, then quickly dispatch local support staff to resolve the event

Receive reminders to perform routine maintenance

Data and Reporting

Collecting data and generating reports helps organizations optimize investments in people, spaces, and technology.

Room usage – how often is the room booked? When is the room used? How long is it used? Who is using it?

Room occupancy – was the room occupied when booked? How many people use the room per meeting?

Device usage – how often is the AV or VTC system used? Which sources are used? How often is the display used (if there's more than one, are both used)?

Crestron Fusion offers standard reports out of the box. Custom reports may also be created by request.
