Data Display Cubes

VS-50XL20U | VS-67XL20U | VS-50XLW20U

XGA Rear Access Data Display Cubes

Mitsubishi's line of 50- and 67-inch high-resolution MegaView Wall rear-access data displays include a proprietary suite of advanced features and functions that result in a display image that is sharper, brighter and more reliable than ever before.

When non-stop monitoring is critical, Mitsubishi's XL MegaView Wall rear-access models are the preferred choice of system integrators. The entire line is equipped with Mitsubishi's first Smart Lamp™ and Smart Colorwheel™ features. Each display wall cube stores its own color characteristics. When a lamp or colorwheel is replaced, this function is then activated, retrieves the data from the display wall cube, and performs a re-calibration of the color adjustments, bringing all of the cubes into perfect color balance. In addition, the VS-50XLW20U is equipped with an exclusive lamp changer device. The cube is able to sense a complete lamp failure or degeneration in brightness of a percentage that the user chooses and automatically switches to a new lamp.

- True XGA, high resolution imagery
- Compact, fully modular and stackable
- Digital Color Space Control (CSC) enables optimal color blending between screens in tiled applications
- Exclusive, award-winning ColorView Natural Color Matrix which produces superb color reproduction and superior picture quality
- Smart Lamp and Smart Colorwheel
- Exclusive lamp changer (VS-50XLW20U)
- Two modes of brightness for optimum viewing
- Comprehensive warranty and toll-free technical support
