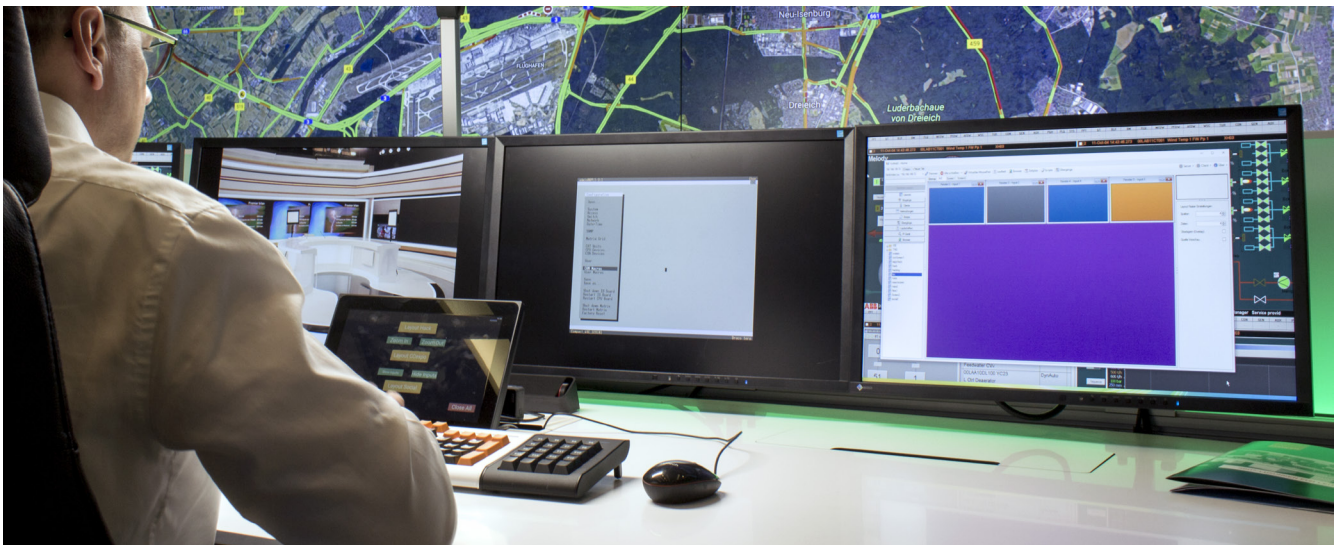
VuStation

The KVM solution for personal video walls

VuStation enables the operator to seamlessly interact with multiple sources on a monitoring and control level from a single station with a single keyboard and mouse. The collaborative VuStation interface supplies the operator with flexibility to have all critical controls and information at his fingertips on a single surface. The userfriendly interface allows the resizing of all windows across the complete input range, accessing multiple sources even if they are on segregated networks. Interfaces can be set up in any configuration with operator-specific templates and groups.



Advantages:

- Control multiple windows within one or multiple surface(s)
- Up to 6x outputs and multiple inputs
- Big desktop surface with 4K per output
- Seamlessly control all sources with one keyboard and mouse
- Customizable view of all windows on your desk
- Non-intrusive control
- Intuitive interface software
- Support for standard Windows applications
- Decoding of IP streams through hardware or software
